All Edge Design products are backed by a complete support package. CAD, BIM and Revit files, specification sheets, and certified testing certificates.

Environmental and Quality accreditation, Nationwide representation, and showrooms in Leighton Buzzard and London.

PRODUCTION

A Wealth Of **Experience**

From its humble beginnings in 1970 Pledge Office Chairs Ltd has established itself as a driving force with the office furniture manufacturing community. Pledge are a “true” office seating manufacturer, not merely component assemblers but having the capability to produce “in house” its components, and design.

This allows the company to produce new designs without the restraints of component suppliers and the problems associated in terms of compatibility and cost. Edge Design – a complete seating solution.

REVIT

Design & **Documentation**

Edge Design realises the importance of Revit for architects, specifiers and facilities managers working on major projects.

We are constantly reviewing our available downloads to ensure they are always up to date.

BIM MODELLING

Level 2 **Compliant**

Edge Design understand that architectural specifiers are looking for design flair and quality from a manufacturer who understands the architectural process and is able to provide the necessary information accurately and quickly.

As well as Level 2 compliant BIM Revit files, 2D and 3D planning icons together with high quality images are available to add to the presentation and space planning resources. These can be downloaded from the Edge Design website.

RIBA & NBS

Design & **Specification**

Edge Design provides a professional specification support service to architects and designers. We understand the requirement for speed and accuracy in our responses to specifiers working under pressure to critical deadlines.

We work closely with the RIBA & NBS and the product portfolio is available as Level 2 compliant BIM objects from the NBS National BIM Library and the specifiers section of the Edge Design website.

TRUE MANUFACTURER

Production **Facilities**

Edge Design are a “true” office seating manufacturer, not merely component assemblers, and we have the capability to design and produce our components in-house. With metal fabrication and woodworking departments, the majority of products are “produced” in Britain.

This “Made in Britain” ethos allows the company to produce new designs reducing the amount of additional component suppliers and the problems associated with compatibility, lead times, continuity and cost.

DESIGNERS

In-house & **Collaborative**

The Edge Design collection has an established and dedicated in-house design team who are developing new product ideas in response to market trends and requirements.

Edge Design also works in partnership with a number of designers to enhance our product offering, and to allow “fresh” input in development.

Technical Information

Assembly

Fifteen units are delivered unassembled (where indicated) and can be assembled easily on-site. We advise that two people carry out the process.

If several units are required for a configured layout we recommend the units are fitted together using the optional Fixing Plates.

NB. Fifteen Internal and External units are supplied with these plates as standard.

Installation

Whilst assembly and installation is easy, we can help with large configurations of Fifteen layouts.

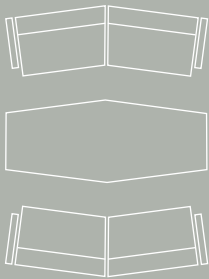

Please contact the sales office to discuss the pricing of large project installation.

Dimensions

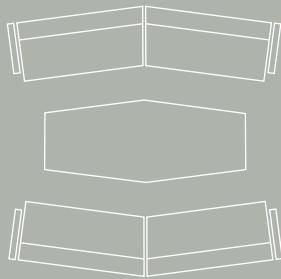

All Fifteen Units are produced using the most exacting construction and production techniques.

When placing several units together, minor tolerances need to be considered when fitting products together using the fixing plates.

FABRICS

Groups & Suitability

Fabric Suitability

Not all standard fabrics are suitable for all of our products.

High wool content fabrics are more suited to task, meeting chairs and soft seating in wide ranging contract areas.

Whilst standard polyesters are more suitable for simpler task and meeting chair applications, coated polyesters and vinyl's are the logical

solution in those "tougher-than-usual" upholstery situations.

If an unsuitable fabric/product selection is made the fabric may become baggy or have unnecessary pleats in the upholstery.

We have included simple suitability icons next to each fabric range to help you to choose an appropriate fabric.

FABRICS

Recommendations & Advice

Upholstery Shown

The material the product has been shown in is listed under the upholstery notes at the bottom of each page.

Colour Sample

We aim to represent colours accurately, however we cannot guarantee the colours exactly match the colours of the actual fabrics due to printing processes.

Please contact our Sales Desk if you would like a fabric sample sent to you.

Customers Own Material

Fabrics not listed or customer supplied fabrics (COM) need to be approved by Pledge Office Chairs before the acceptance of orders. A pattern charge may apply for some fabrics.

We also reserve the right to reject a fabric that we believe to be unsuitable for the product.

We are unable to guarantee any product meeting fire regulations or standards which is supplied in a COM.

Colour Variations

Whilst every effort is made, no guarantees are made against the variance in colour of commercial fabrics, this may be apparent on repeat orders. All striped fabric will be upholstered vertically unless advised.

Spirit & Runna Fabric Suitability

Some fabrics have been specified as unsuitable for some of the Spirit Collection, whilst Runna Tub Chairs (not poufs) can only be upholstered in a select range of fabrics.

ENVIRONMENTAL POLICY

Sustainability **Approach**

Edge Design are confident that we have an environmental policy which commits us to reducing waste and energy.

With a clearly defined set of objectives, our aim is to ensure that Edge Design is run in an environmentally friendly and sustainable manner with the minimum amount of impact to the environment.

Edge Designs' approach to sustainability means operating and growing the business in such a way that meets the needs of the present whilst conserving resources for future generations.

We believe that to ensure continued success, our commitment to fairness, integrity and honesty must extend beyond our members and employees to the communities in which we operate, to our partners and to the environment at large.

All manufacturing activity has some impact on the environment. It is the policy of Edge Design to make itself aware of the impact of its activity on the environment, and reduce that impact wherever possible.

It is also Company Policy to conduct its business in the light of developing and understanding evolution of technology in ways designed to reduce adverse effects on the environment working with like minded companies to achieve this.

CHAIN OF CUSTODY

Environmentally **Certified**

The Company recognises that it has a duty to reduce, wherever possible, the impact of its operations on the environment.

Therefore, Edge Design accepts that verification, by one of the accredited, independent, certification contractors is a preferred means of proving that chairs with wooden component parts actually possess the environmentally friendly attributes claimed for them.

Our Environmental Chain of Custody Certification is an "independent scrutiny" through BM-TRADA's TRADA-Trak scheme.

A Chain of Custody certificate is evidence that a business has installed management systems that enable an environmentally certified product to be tracked back to its source, thus proving that the product actually possesses the environmental credentials claimed for it.

While the presence of an environmental label, such as FSC™ on a product indicates that the wood it contains comes from well-managed forests that are independently certified, any subsequent owner of the product requires their own Chain of Custody certificate to be able to describe the goods as environmentally certified to the consumer.

Only possession of a valid certificate entitles a business to use environmental trademarks and logos in promoting or describing environmentally certified products.

Edge Design operates under certificate number TT-COC-1809 for FSC™ certified product.

CARBON NEUTRAL

Our Responsibility

As a manufacturer, we believe we should ensure that the company, as a whole, produces the smallest carbon footprint possible.

Listed here are a few of the ways we achieve this:

- *Ensure that we procure from companies that adopt procedures to reduce carbon emissions*
- *Source wooden products from managed supplies (FSC™)*
- *Eliminate the use of harmful substances and chemicals*
- *Control deliveries to minimise emissions from vehicles and wasting fuel*
- *Ensure that our manufacturing base uses fuel efficiently*

This is demonstrated with compliance to, and obtaining independent audits from our accreditation to ISO14001, and FISP - Furniture Industry Sustainability Programme.

It is our belief that Edge Design can achieve a greater reduction in its overall environmental impact and we consider this to be our responsibility.
