SPECIFICATION GUIDE

2019 v1

PLEDGE

INTRODUCTION

Established in 1970 Pledge Office Chairs have remained one of the countries leading office seating manufacturers.

The products contained within this specifier guide are not a collection of assembled components, Pledge prides itself in being a “true” office seating manufacturer as many of the components are produced in-house within our own premises, along with the design, development and marketing.

This not only offers value for money, continuity of supply, and products with a distinct signature, but more importantly has a positive effect on the environment.

Our overall product portfolio caters for many market sectors, applications and status needs, and offers a design theme allowing our products to be specified throughout any organisation.

Thank you for choosing Pledge Office Chairs.

POSTURE AND ERGONOMICS

A good working posture is one that requires the least amount of static muscle work with least muscular effort. The more varied the posture the better.

The correct sitting position is the critical first step in minimising the risk of back pain.

The spine is one of the most delicate parts of the human body. As demonstrated in (fig. 3), an incorrect sitting position such as slouching may result in an unhealthy curve of the spine and puts increased pressure on the soft tissues (muscles, discs and so on).

The first two illustrations (figs. 1 and 2) show the use of an upright sitting position, used in combination with a correctly positioned computer screen and keyboard. The lumbar curve is maintained in this way, which helps to reduce the pressure on the structures of the back.

ADJUST THE CHAIR FOR HEALTH

All Posture Collection chairs can be adjusted in many ways to support and allow movement to reduce the onset of discomfort. Here are the key points to remember when adjusting the chair to ensure a good working posture is achieved:

- Initially sit at the desk, looking squarely at the computer. You are now ready to adjust your chair.
- Firstly, adjust the seat height so that your elbows are resting slightly higher than the desk surface (shoulders relaxed). Your thighs should be between 90-95 degrees to the upright body. You may require a footrest if your feet are not comfortably flat on the floor. The top of the display screen should be approximately at eye level (you may need to raise the screen) see fig. 1.
- Secondly, adjust the seat depth - that is the horizontal part of the chair seat - so that you can sit firmly against the back pad with a small gap between the front of the seat pad and the back of your knees.
- Next the height of your backrest should be adjusted to match the small of the back. To avoid neck and shoulder tension, shoulders should be relaxed. Additional neck support is generally only required where the person benefits from leaning back to change their posture and requires further support. It is rarely used whilst the person is working; more when they are reclining.
- Sitting in your normal working posture, your forearms should rest slightly higher than the working surface, whether using the keyboard, the mouse, or paperwork. Armrests are to be used when resting and encourage you to lean back and take the strain off your upper limbs.
- Lastly, release the seat and back locking mechanism so the chair can move freely. This free movement encourages your muscles to work and to help your circulation. It greatly helps to reduce discomfort in a sedentary job.

MEASUREMENTS

In order to supply the right chair for each individual user, the correct measurements must be taken.

Use the diagrams and guidelines illustrated below to specify the correct type of chair. All measurements are in mm and should be taken with the person in a seated position.

A chair that promotes an upright back posture while working at the desk is encouraged.

TAKING_USER_MEASUREMENTS

(A) Seat Width

This measurement is taken from the width of the hips at the widest point. It may be easier to measure the person sat on a chair without arms.

(B) Seat Height

Measure from the back of the person's knees to the floor. Make sure the user is in a seated position and the feet are flat on the floor. Ensure their typical footwear is considered.

(C) Seat Depth

Taken from the back of the buttock to the back of the knee. NB. All Posture Collection chairs are standard with a seat slide that offers an additional 50mm of depth.

(D) Backrest Height

Whilst sitting upright, measure from the top of the seat pad to the top of the shoulder (the bony prominence at the outer edge of the shoulder). A headrest option for additional support is also available on selected models.

(E) Backrest Width

Sitting upright, measure across the back at the widest point.

OTHER_KEY_MEASUREMENTS

(F) Armrest Height

This measurement is taken from the top of the seat pad to the underside of the elbow ensuring their shoulders are relaxed. This will help determine whether the benefit of adjustable arms is required.

(G) Armrest Width

Measured from the inside of the arm pads in both standard and widest positions. A person exceeding the width of this dimension will not require adjustable arms.

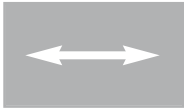

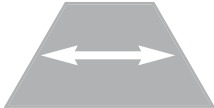

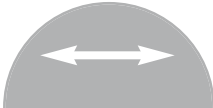

Workstation Height/Thickness

Measure the height from the desk surface to the floor.

NB. Also measure the thickness of the desk and any obstructions.

FABRIC_SUITABILITY

Not all our standard fabrics are suitable for all of our products. Wool works well on task, meeting chairs and soft seating in wide ranging contract areas.

Standard polyesters are more suited to simpler task and meeting chair applications, whilst coated polyesters and vinyl's are sometimes the logical solution in those "tougher-than-usual" upholstery scenarios.

If an unsuitable fabric/product selection is made the fabric may become baggy or have unnecessary pleats in the upholstery.

In view of this we have included simple suitability icons next to each fabric range to help you to choose a suitable fabric.

Task & Meeting 
(all other pages)

Soft Seating 
(pages 58-67)

Please make sure that you check the suitability of the fabric against the product category before specifying or ordering our products.

Please also check the suitability of Customers Own Material (COM) fabrics.

FABRIC_GROUPS

Please contact our Sales Desk for a price if the product is not listed. Please make sure you check the suitability of a fabric before recommending a product.

COLOUR_VARIATIONS

Whilst every effort is made, no guarantees are made against the variance in colour of commercial fabrics, this may be apparent on repeat orders. All striped fabric will be upholstered vertically unless advised.

UPHOLSTERY_SHOWN

The material a product has been upholstered in is displayed under the Upholstery & Product Notes at the bottom of each pricing page.

While every effort is made to represent colours accurately, we cannot guarantee the colours you see exactly match the colours of the actual fabrics due to printing processes.

Please contact our Sales Desk if you would like any fabric samples sent out to you.

FABRIC_SURCHARGE

Fabrics not listed in this Retail Guide may be subject to a £15 surcharge.

CUSTOMERS_OWN_MATERIAL

Fabrics not listed or customer supplied fabrics (COM) need to be approved by Pledge Office Chairs before the acceptance of orders. A pattern charge may apply for some fabrics.

We also reserve the right to reject fabric that we believe to be unsuitable for the product. We are unable to guarantee any product meeting fire regulations or standards which is supplied in a COM.

ENVIRONMENTAL_POLICY

Pledge Office Chairs Ltd are confident that we have an environmental policy which commits us to reducing waste and energy. With a clearly defined set of objectives, our aim is to ensure that Pledge Office Chairs is run in an environmentally friendly and sustainable manner with the minimum amount of impact to the environment.	Pledge Office Chairs' approach to sustainability means operating and growing the business in such a way that meets the needs of the present whilst conserving resources for future generations. We believe that to ensure continued success, our commitment to fairness, integrity and honesty must extend beyond our members and employees to the communities in which we operate, to our partners and to the environment at large.	All manufacturing activity has some impact on the environment. It is the policy of Pledge Office Chairs to make itself aware of the impact of its activity on the environment, and reduce that impact wherever possible. It is also Company Policy to conduct its business in the light of developing and understanding the evolution of technology in ways designed to reduce adverse effects on the environment and work with like minded companies to achieve this.
--	--	--

CHAIN_OF_CUSTODY

The Company recognises that it has a duty to reduce, wherever possible, the impact of its operations on the environment. Therefore, Pledge Office Chairs accepts that verification, by one of the accredited, independent, certification contractors is a preferred means of proving that chairs with wooden component parts actually possess the environmentally friendly attributes claimed for them.	Our Environmental Chain of Custody Certification is an "independent scrutiny", through BM-TRADA's TRADA-Trak scheme. While the presence of an environmental label, such as FSC™ on a product indicates that the wood it contains comes from well-managed forests that are independently certified, any subsequent owner of the product requires their own Chain of Custody certificate to be able to describe the goods as environmentally certified to the consumer.	A Chain of Custody certificate is evidence that a business has installed management systems that enable an environmentally certified product to be tracked back to its source, thus proving that the product actually possesses the environmental credentials claimed for it. Only possession of a valid certificate entitles a business to use environmental trademarks and logos in promoting or describing environmentally certified products. Pledge Office Chairs operates under certificate number TT-COC-1809 for FSC™ certified product.

CARBON_NEUTRAL

As a manufacturer, we believe we should ensure that the company, as a whole, produces the smallest carbon footprint possible. Listed below are a few of the ways we achieve this:

- Ensure that we procure from companies that adopt procedures to reduce carbon emissions
- Source wooden products from managed supplies (FSC®)
- Eliminate the use of harmful substances and chemicals
- Control deliveries to minimise emissions from vehicles and wasting fuel
- Ensure that our manufacturing base uses fuel efficiently

This can be demonstrated with compliance to, and obtaining independent audits from our accreditation to ISO14001, and FISP - Furniture Industry Sustainability Programme.

It is our belief that Pledge Office Chairs can achieve a greater reduction in its overall environmental impact and we consider this to be our responsibility.

QUALITY_&_STANDARDS

Pledge Office Chairs is accredited to ISO 9001. Whilst all chairs are manufactured to conform to all the relevant British and European standards, most of our models are also certified to these standards.

As a company we carry out constant independent testing to make sure that all our products are durable and safe. We believe we have more products tested and certified than many other manufacturers, and will test products for certification should it be required to fulfil a tender specification.

(d) maintain the Goods in satisfactory condition and keep them insured on Pledge's behalf for their full price against all risks to the reasonable satisfaction of Pledge. On request the Buyer shall produce the policy of insurance to Pledge.
